

Remember

“Mornings, before daylight, I slipped into corn fields and borrowed a watermelon, or a mushmelon, or a punkin, or some new corn, or things of that kind. Pap always said it warn’t no harm to borrow things, if you was meaning to pay them back, sometime; but the widow said it warn’t anything but a soft name for stealing, and no decent body would do it.”

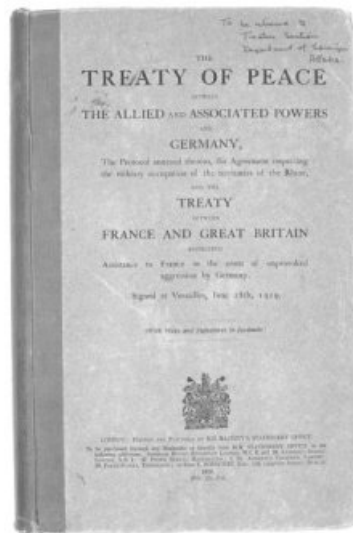

—Huckleberry Finn

At last, some good news. After bearing witness to Van Rjien’s little manoeuvre, you can’t help the smirk on your face. In any case, it’s time to get down to business. Van Rjien said to find the main storage compound, but with its location unbeknownst to you, a map would sure come in handy.

Several unsuccessful searches in apparently disused rooms later, you stumble into what appears to be the drawing room. Jackpot! You think to yourself as you take an emergency floor plan off the wall. Whoever designed this mansion certainly has a very unique perspective of architecture. Mounted upon random rectangles protruding from the walls are familiar looking pictures of events.
