Feedback from Previous Classes

620-231 continues to be very well received by students. Many students commented on how much they enjoyed the subject, and how the lectures and tutorials were very helpful in aiding their understanding of the key concepts.

The booklet of partial lecture notes introduced in semester 2, 2005 were very popular with students, so they will be used again this semester. The notes contain all of the theory, statement of questions to be considered in lectures and complicated diagrams. Gaps have been left in the notes for students to fill in the working of examples during lectures.

Two weeks of the subject has been revised so that 620-231 follows on closely from the new first year subjects that were introduced in 2005.
