Analyst/Consultant

TSG Consulting (www.tsgconsulting.com.au) specialises in providing operations research services to blue chip Australian and international mining, manufacturing, processing and infrastructure clients. With offices in Melbourne and Perth, TSG is dedicated to adding value to our client’s operations and production systems by using the latest discrete event simulation, operations research, modelling and analysis techniques.

TSG is experiencing rapid growth in demand for its services and is now seeking to achieve sustainable growth by adding high calibre individuals to the team. A vacancy exists for an Analyst/Consultant with up to two years experience.

The Opportunity
- Melbourne based Consultant/Analyst/Programmer.
- Team based solution focussed consulting projects.
- Participation in all aspects of the consulting process from problem definition, data gathering, data analysis, model building, scenario evaluation and client presentations.
- Training in TSG’s suite of analysis techniques.

This opportunity is only limited by the successful applicant’s ability to provide value to our clients and contribute to the growth of the group.

The Successful Candidate will score highly against the following criteria:-
- A flair for understanding systems, developing models, using models to gain insight and explaining those insights to clients.
- Tertiary qualified in a technical discipline (Operations Research/Statistics/Engineering/Computer Science)
- Competent programming skills in a high-level language (C/VBA etc).
- Strong written and verbal communication skills.
- Exposure to Discrete Event Simulation or Monte Carlo techniques.
- Advanced Excel user (VBA experience preferred).

Applicants should forward a brief resume to hr@tsgconsulting.com.au, with “Melbourne Position” in the subject line.
